

AYOOLUWA PAUL OBEMBE

QA Automation Engineer | AI Reliability & Model Evaluation | Test Automation

Lagos, Nigeria • (+234) 805-760-6459 • Obembeayooluwa.work@gmail.com

[LinkedIn](#) • [GitHub](#) • [TestAlgnite \(npm\)](#)

PROFESSIONAL SUMMARY

QA Automation Engineer building CI-ready test automation for high-traffic SaaS and regulated fintech platforms. Works across end-to-end, API, and regression automation (Cypress, Playwright, Postman) with a specialization in AI reliability and LLM/agent evaluation. Creator of **TestAlgnite**, a published Node.js (npm) package that orchestrates Llama 3, Mixtral, and Phi-3 for autonomous root-cause analysis. Currently leading QA automation for RegTech compliance platforms, pairing a legal background with modern test engineering to ship auditable, production-grade systems.

CORE SKILLS

Test Automation: Cypress, Playwright, Pytest, Appium, Katalon; end-to-end, regression & cross-platform testing

AI & Advanced QE: LLM testing, agentic RAG evaluation, multi-agent orchestration (Llama 3, Mixtral, Phi-3), prompt engineering, BDD/Gherkin, RTM traceability, n8n/Zapier

API & Performance: Postman (Advanced/Newman), REST API testing, K6 load testing

Programming: JavaScript, TypeScript, Python, Java, PowerShell

CI/CD & Tools: GitHub Actions, Jenkins, Docker, Jira, CodeQL, GitHub Pages

PROFESSIONAL EXPERIENCE

Lead AI Systems & QA Engineer — Opex Consulting (RegTech365)

Lagos, Nigeria | December 2025 – Present

- Lead QA automation for the RegTech365 platform serving Tier-1 financial institutions (Zenith Bank, Moniepoint), supporting CBN, AML/CFT and ISO 27001 compliance with audit-ready evidence.
- Built a BDD-first framework with agentic orchestration for automated Gherkin verification and direct requirements-traceability (RTM) mapping, cutting test-automation delivery time by ~70%.
- Architected a Playwright + API automation suite (Postman, Newman, PowerShell) for high-security fintech integrations, surfacing high-severity blockers before deployment.
- Integrated AI-powered root-cause analysis using multi-agent orchestration (Llama 3, Mixtral, Phi-3) to speed defect classification and triage.
- Created real-time CI analytics dashboards on GitHub Pages, giving the team continuous observability across all pipeline runs.

Software QA Engineer — Walure

Remote | December 2023 – December 2025

- Owned the end-to-end defect lifecycle for high-traffic SaaS platforms (Hive), delivering Cypress and Katalon regression automation that raised automated test coverage to ~95%.
- Eliminated roughly 60% of high-severity pre-deployment blockers through advanced API and microservices testing with Postman.

Freelance / Contract QA Engineer

Remote | 2024 – 2025

- Testlio (Estonia):** functional and automated testing for global SaaS and mobile apps across diverse OS environments; reduced release-stage defects by ~45%.
- Client engagements: **BBC News** (London), **Matterport** (Sunnyvale), **FELLI Music** (New York), and **Wellcrafted** (London) — functional, regression and mobile testing across web and mobile products.

PROJECTS & RECOGNITION

- TestAlgnite** (published npm package) — autonomous QA intelligence tool orchestrating Llama 3, Mixtral and Phi-3 for root-cause analysis; reduces manual RCA time by ~70% in distributed test environments.
- Wema Bank Hackaholics 6.0** — 3rd place regional qualifier (top 1% of 1,000+ applicants); engineered QA workflows that accelerated fintech prototype delivery by ~40%.

EDUCATION & CERTIFICATIONS

- **Barrister at Law (BL)** — Nigerian Law School, 2025
- **Bachelor of Laws (LL.B)** — Redeemer's University, 2022
- Certifications: JavaScript (Meta); API Automation with Postman; Software QA Engineering (Walure); Information Security & API Security Fundamentals.
